

Preparation Phase

Setting up Application Environment

Team ID	PNT2022TMID19786
Project Name	Skill / Job Recommender Application

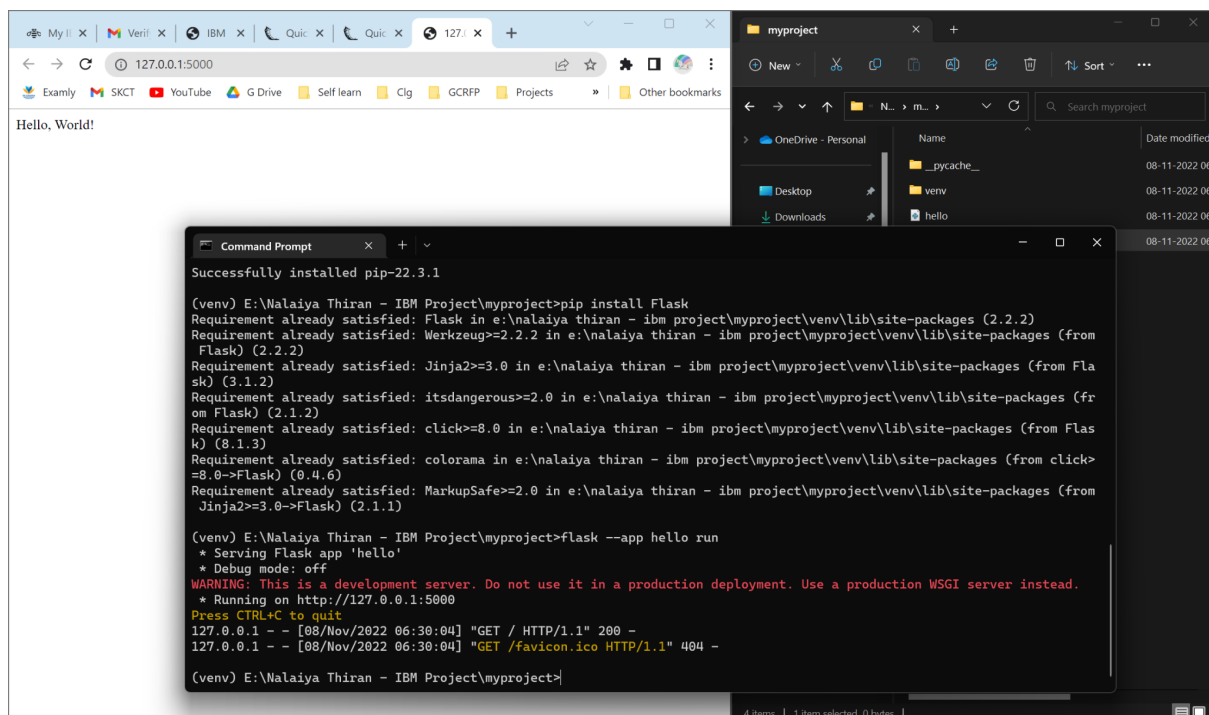

1. Create Flask Project:

Open Command Prompt > Type Python Or py > Hit Enter If Python Is Installed it will show the version Details.

If you don't have one, Install the latest version from <https://www.python.org/downloads/>

After Installing it, go to the Reference Link 1 (given below the screenshot) & install Flask.

Then go to Reference Link 2 to create a new Flask Project.
